

Thank you for purchasing Happy Trails products. Our products are proudly hand made in Boise Idaho, USA. If you have any questions or concerns about the installation of this product, please contact us directly at 1-800-444-8770 or e-mail installation@happy-trail.com.

Before you begin, place the bike on a hard level surface where you have room to work. Lay out the parts included in this kit and compare to the parts list in these instructions. If any parts or hardware are missing, contact us immediately at the number listed above.

NOTE:
When installing HT guards and racks, leave all bolts loose until entire rack is fitted. This allows the rack to move and take up differences in frame constructions. We recommend that thread locking compound be used on all bolts.

Installation Instructions

Installation is very simple. Refer to the photo below for detail. Working on one side, thread the M8x45 bolt through the rear most mount on the top. Then start the M8x40 at the passenger peg bracket.

At the front mount on the top of the SL rack, use enclosed spacers if you are not running any type of top rack. You may need to modify the spacers by cutting them to length depending on what top rack you are using. With no top rack installed, stack both spacers to create a 2" spacer then thread the M6x80 bolt through and into the frame.

Once all points are connected, tighten each point to complete the installation.

Point where spacers may be needed.

Bolt List:

2	M8x45 SHCS	Upper Rear Mount
2	M8x40 SHCS	Mount @ Passenger pegs
2	M6x80 SHCS	Mount @ Side Panel
